

# LITTLE ARROWS

December News | School Events | Curriculum

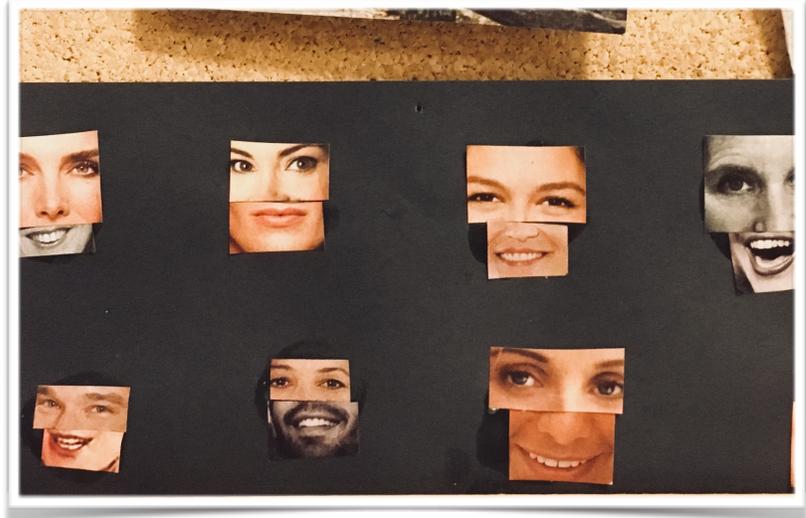

## Artist of the Month

Jan Vermeer. Vermeer was born in 1632 and is famous for his portraits and scenes of life with a light flooded wall as a background. Vermeer's art provides a feeling of timelessness and peacefulness bathed in pearly light. His works were almost entirely portraits made up of a cross section of society from the milkmaid to the splendid merchant.

## Scientist of the Month

Lev Vygotsky. Vygotsky was born in 1896 and was the soviet founder of cultural-historical psychology.

Lev investigated child development and more specifically concept formation, the interaction between language and thought and play as a psychological phenomenon.

## PEOPLE MONTH!

December is People Month at Little Arrows. We will be studying about who we are, our ancestry, our feelings, our senses, our bodies, and our social and Family structures. We will acknowledge and study our oneness and sameness. How are we different from everything else? How are we similar? We will explore the basic needs of humans; food, water, shelter, clothing, and social connection. What is our spirit? What is our soul? How can we better take care of each other? We ask and discover!

## SCHOOL DATES

December 23-Jan. 3 - School Closed - Winter Recess!

January 6 - Happy New Year! - School Resumes!
